

**CLAIMS**

1. An improved tile-, floor tile- or similar-type ceramic piece, of a kind that is arranged contiguously in rows and columns forming a grid,  
sides of said piece being provided with projections and depressions to be slotted together;  
said projections and depressions breaking a continuity in lines of said grid, making it difficult to distinguish said lines;  
wherein said projections and depressions are adapted to a corresponding decorative motif, enable ornamentations in sets of pieces with a non-grid structure.
2. An improved tile-, floor tile- or similar-type ceramic piece, according to claim 1, wherein  
said projections and depressions are provided with a trapezoidal shape;  
one projection being included in a central part of one side of the piece, another projection in the centre of the opposite side,  
a depression in the centre of another side of the piece and a further depression in the centre of the side opposite to said latter side.
3. An improved tile-, floor tile- or similar-type ceramic piece, according to claim 1, wherein the ornamentation is natural stone.
4. An improved tile-, floor tile- or similar-type ceramic piece, according to claim 1, wherein the ornamentation is parquet.

5. An improved tile-, floor tile- or similar-type ceramic piece, according to claim 1, wherein the ornamentation is mosaic.

6. An improved tile-, floor tile- or similar-type ceramic piece, according to claim 2, wherein the ornamentation is natural stone.

7. An improved tile-, floor tile- or similar-type ceramic piece, according to claim 2, wherein the ornamentation is parquet.

8. An improved tile-, floor tile- or similar-type ceramic piece, according to claim 2, wherein the ornamentation is mosaic.
